Professional Summary

Junior Full Stack Developer with an Associate Degree in Computer Programming (UTN), focused on backend development with Java and Spring Boot. Built and deployed to production the management system of Club Banco de Córdoba (500+ members) using REST APIs, Spring Security with JWT, PostgreSQL and Angular. Seeking my first role as a Junior Java, Backend or Full Stack Developer.

Technical Skills

- **Backend:** Java, Spring Boot, Spring Security, JWT, Spring Data JPA, Hibernate, REST APIs, Swagger / OpenAPI, Maven, JUnit, Mockito
- **Frontend:** Angular, TypeScript, JavaScript, HTML, CSS, Bootstrap, Chart.js
- **Databases:** SQL, PostgreSQL, SQL Server, MySQL, Supabase
- **Tools & practices:** Git, GitHub, GitHub Actions (CI/CD), Docker, Postman, Render, Netlify, layered architecture, MVC, SOLID, GitHub Copilot

Experience

Full Stack Developer (Freelance) – Club Banco de Córdoba

Córdoba, Argentina · 2026 – Present

Java · Spring Boot · Spring Security · JWT · Angular · PostgreSQL · Supabase · Chart.js · Render · Netlify

- Built the club's management system end to end; it is now in production, managing 500+ members and 7 sports.
- Designed REST APIs with Java and Spring Boot using a layered architecture, with JWT authentication and role-based access control through Spring Security.
- Built the Angular admin panel (members, sports, fees, payments, debts, income and expenses) with Chart.js financial dashboards and Excel report export.
- Modeled the PostgreSQL database, optimized SQL queries and deployed the system on Netlify, Render and Supabase.

Full Stack Developer – Lautaro Diesel E-commerce (UTN Capstone Project)

UTN Facultad Regional Córdoba · 2025 – 2026 · View on GitHub

Java · Spring Boot · Spring Security · JWT · Angular · TypeScript · SQL Server · Mercado Pago

- Developed the backend with Java and Spring Boot using a layered architecture, with inventory management and security via Spring Security and JWT.
- Built a responsive frontend with Angular and TypeScript and designed the SQL Server persistence layer.
- Integrated online payments with Mercado Pago Checkout Pro.

Burger Restaurant Website (Personal project) – Responsive website built with Angular and TypeScript using reusable components. View on GitHub

Education

Associate Degree in Computer Programming (Técnico Universitario en Programación) – Universidad Tecnológica Nacional (UTN), Facultad Regional Córdoba · 2022 – 2026
